International Commission on Occupational Health

About ICOH

The International Commission on Occupational Health (ICOH) is an international non-profitmaking, non-political, multidisciplinary scientific organisation whose sole purpose is to foster the scientific progress, knowledge and development of occupational health and related subjects on an international basis.

(Constitution, Article 1, Section 1)

About ICOH

ICOH provides a forum for scientific and professional communication. To achieve this purpose, the ICOH:

- sponsors international congresses and meetings on occupational health;
- establishes scientific committees in various fields of occupational health and related subjects;
- disseminates information on occupational health activities;
- issues guidelines and reports on occupational health and related subjects;

About ICOH

- collaborates with appropriate international and national bodies on matters concerning occupational and environmental health;

- takes any other appropriate action related to the field of occupational health;
- solicits and administers such funds as may be required in furtherance of its objectives.

(Constitution, Article 1, Section 2)

Abolition of the numerous clauses for national delegation membership has increased from 190 to 1127 and the countries represented have increased from 36 to 71.

21th International Congress for Occupational Health 1984 - Dublin

The Permanent Commission and International Association of Occupational Health becomes International Commission on Occupational Health (ICOH).
New professional groups participate: industrial medical officers, occupational health specialist, etc.

Seoul Statement on the Development of Occupational Health Services for All

Seoul Statement on the Development of Occupational Health Services for All

The 31st International Congress on Occupational Health, ICOH 2015, was organized by the International Commission on Occupational Health, ICOH, the Korea Occupational Safety and Health Agency, KOSHA, and the Korean Society of Occupational and Environmental Medicine, KSOEM, from 31 May to 5 June 2015 in Seoul, Republic of Korea. The Congress approved a "Seoul Statement on the Development of Occupational Health Services for All".

Recalling
that decent conditions of work, occupational health and occupational safety constitute a basic human right of workers as declared by the UN International Covenant on Economic, Social and Cultural Rights of working people (1966), the ILO Declaration on Fundamental Principles and Rights at Work (1998), the Centennial Declaration of the International Commission on Occupational Health, ICOH (2006) and the Seoul Declaration on Safety and Health at Work adopted by the ILO, ISSA, KOSHA and ICOH together with a high number of other Non-Governmental and Professional Associations (2008),

Emphasizing
that in spite of positive developments of occupational safety and health particularly in industrialized countries, over three quarters of workers of the world live and work in developing and transitory countries, often working in high risk occupations in both formal and informal sectors, without adequate protection by occupational health and safety law and lacking social protection and access to occupational health services. Such gaps in prevention and protection lead to 2.3 million deaths among the workers of the world every year,

Keeping in mind
that the ILO Convention No. 161 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All, as well as the Cancun Charter by the ICOH (2012), call for organization of occupational health services for all working individuals and all occupations, without exclusion of any group of workers, economic sectors, including the informal sector, or workers in contracted or self-employment,

Taking into consideration
that new challenges, risks and hazards continuously emerge, due to changes in economic structures, transfer of technologies, demographic changes, migration and social dynamics. The management of and adjustment to the continuous change need active sharing of information, the effective use of existing knowledge, and the generation of new research on occupational health.

Recognizing
that a growing body of research evidence speaks for positive economic and productivity impact of occupational health services, due to prevention of loss by accidents and diseases, sickness absenteeism and disabilities, and through facilitation of production processes,

Reminding
that according to the principles of the ICOH International Code of Ethics for Occupational Health Professionals, protection and promotion of workers' health is a professional, ethical and social imperative for all occupational health professionals and for the international occupational health community,

the 31st ICOH Congress states the following:

1. Policies
Every government in collaboration with social partners should, as a part of their stewardship, draw up necessary regulations, strategies and programmes for national policies on occupational health and occupational health services by using the international guidance provided by the ILO Convention No. 161, Recommendation No. 171 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All. Such policy should aim at the provision of services for all, with full coverage without exclusion of any group or sector of work life.

2. Implementation
Implementation of occupational health policies should be based on legislation, with appropriate governance structures, well-defined rights and responsibilities, establishment and strengthening of the occupational health system and respective infrastructures, and sufficient resources and financing for services. Special measures, multiple service provision models, including primary health care, and support should be developed for organization of occupational health services for small-scale enterprises, the self-employed and the informal sectors. Public occupational health services should be provided for the underserved sectors. Where front-line services are of limited scope, usually occupational medicine and nursing, they should be reinforced by secondary level support services.

3. Content and activities
The content and activities of occupational health services at the workplace level include prevention and management of physical, chemical, biological and ergonomic factors, prevention of occupational diseases and injuries, prevention of excessive work load, and work life constrains, promotion of health and work ability, rehabilitation and return to work, as well as first aid and curative services. Such services should be adjusted to the health needs of working people, by taking into consideration the existing hazards and responding to the needs of various groups of workers, including young, female, ageing and migrant workers and various types of vulnerable groups.

Dublin Statement on Occupational Health

New Avenues for Prevention of Occupational Cancer and Other Severe Occupational Health Hazards

Preamble

The 32nd International Congress on Occupational Health, ICOH 2018, was organized by the International Commission on Occupational Health, ICOH and the Royal College of Physicians of Ireland, Faculty of Occupational Medicine, in Dublin on 29 April–4 May 2018.

Recalling

- the UN 2030 Agenda for Sustainable Development, particularly Sustainable Development Goals Nos. 1, 3, and 8;
- the 66th UN General Assembly Resolution 16 September 2011 Political declaration of the High-level Meeting of the General Assembly on the Prevention and Control of Non-communicable Diseases;
- the ILO Declaration on Fundamental Principles and Rights at Work, adopted by the 86th International Labour Conference on 15 June 2010; ILO Conventions No. 155 of 1981 and No. 187 of 2006 on Occupational Safety and Health and Convention No. 161 on Occupational Health Services of 1985, ILO Asbestos Convention No. 162 of 1986, Occupational Cancer Convention No. 139 of 1974 and the ILO Resolution of 1 June 2006 concerning asbestos; and
- the 58th World Health Assembly Resolution No. WHA58.22 on Cancer Prevention and Control of 2005 including provisions for prevention of cancer at the workplace related to exposures to chemicals, tobacco smoke, certain infectious agents, solar and ionizing radiation and taking into consideration the 70th WHA Resolution 70.32 of 2017 on cancer prevention and control in the context of an integrated approach;

ICOH GENERAL ASSEMBLY

The General Assembly is the supreme governing body of the ICOH.
It approves the Constitution, elects honorary members, one Auditor and one Vice-auditor, and decides on the venue of triennial International Congresses.
The General Assembly also sets fees, accepts and approves the financial accounts, accepts the Auditor's report taking such action on it as is necessary, and approves the report on the activities of the Scientific Committees.
It consists of the individual members in good standing and one representative of each collective member.

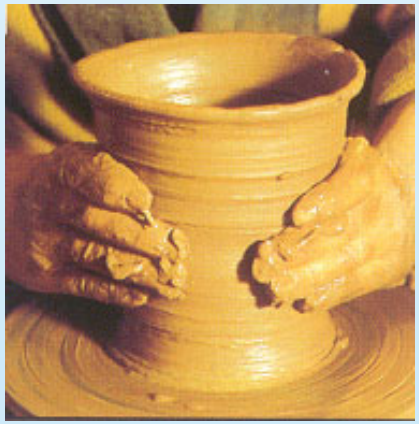
ICOH Accomplishments

ICOH activities cover a wide range of topics, as reflected by the **37 Scientific Committees**, each one focused on a specific field of work.



Scientific Committees

- Accident Prevention
- Aging and Work
- Allergy and Immunotoxicology
- Cardiology in Occupational Health
- Education and Training in Occupational Health
- Effectiveness in Occupational Health Services
- Emergency Preparedness and Response in Occupational Health
- Epidemiology in Occupational Health

Scientific Committees

- History of Prevention of Occupational and Environmental Diseases
- Indoor Air Quality and Health
- Industrial Hygiene
- Mining Occupational Safety and Health
- Musculoskeletal Disorders
- Nanomaterial Workers' Health
- Neurotoxicology and Psychophysiology
- Occupational and Environmental Dermatoses
- Occupational Health and Development

Scientific Committees

- Occupational Health for Health Workers
- Occupational Health in Small-Scale Enterprises and the Informal Sector
- Occupational Health in the Chemical Industry (MEDICHEM)
- Occupational Health in the Construction Industry
- Occupational Health Nursing
- Occupational Medicine
- Occupational Toxicology
- Radiation and Work
- Reproductive Hazards in the Workplace

Scientific Committees

- Respiratory Disorders
- Rural Health: Agriculture, Pesticides and Organic Dusts
- Shiftwork and Working Time
- Thermal Factors
- Toxicology of Metals
- Unemployment, Job Insecurity and Health
- Vibration and Noise
- Women Health and Work
- Work and Vision
- Work Disability Prevention and Integration
- Work Organization and Psychosocial Factors

ICOH APPLICATION FORM: HOW TO BECOME AN ICOH MEMBER

The International Commission on Occupational Health (ICOH) is an international non-governmental organization dedicated to scientific progress, knowledge, and development of occupational health and safety.

Founded in 1906 in Milan, Italy, ICOH currently has over 1,500 members in 85 countries. ICOH is recognized by the United Nations as non-governmental organization and has a close working relationship with the International Labour Organization, World Health Organization, International Security Association, International Ergonomics Association, and International Occupational Hygiene Association. ICOH hold International Congresses on occupational health, and its official languages are English and French.

ICOH's Purposes: to enhance the knowledge of members in the field of occupational health

- To generate and disseminate scientific knowledge in occupational health
- To support and promote use of knowledge in occupational health practice and in training,
- To promote and maintain the highest standards of moral and professional commitment to the health and safety of workers and their families

Benefits for ICOH members:

- Substantial reduction of the registration fee of the triennial International Congresses, including ICOH 2006 (see "Registration" chapter) and some other ICOH-sponsored conferences.
- Reductions of the subscription rates of international scientific journals (20-30%), on the price of all ILO publications (50%) and on all WHO information products (40%).
- Participation in the activities of up to three of the 35 scientific committees as well as submit materials for publication in the Newsletter.

ICOH Accomplishments

ICOH activities cover a wide range of topics, as reflected by the 35 ICOH Scientific Committees and 3 Collaborative Networks. Some of these aim at chemical, physical or ergonomic exposures; others take up health issues, services and methods in different occupational branches, still others focus on accident and disease prevention, and more recently work organization and psychosocial factors, and unemployment and health.

Active membership fees for year 2005:

- 20 CHF for countries with GDP/pc lower than 15,000 US$
- 90 CHF for countries with GDP/pc higher than 15,000 US$

Check your country GDP/pc at www.icoh.org.sg !
